

To God  
Be the  
*Glory!*

A photograph of three children standing on a reddish-brown dirt path in a rural area. On the left, a girl in a grey hooded dress covers her mouth with her hands. In the center, a taller child carries a baby on their back, wrapped in a yellow and orange cloth. On the right, a younger child in a brown shirt and grey skirt waves. The background shows green vegetation and a dirt road.

These children in Burundi have access to Kibuye Hope Hospital which relies on solar energy. We helped install an upgrade to their solar-power system, so this mission hospital is now able to provide services 24/7. The staff members are intentional about meeting both the physical and spiritual needs of those they serve.

Great things he has done!

Declare his glory among the nations,  
his marvelous deeds among all peoples.

- 1 CHRON. 16:24 (NIV)

Because of the outpouring of mercy in our lives, we at SonSet Solutions are eager to proclaim the **excellencies of our God**. It is our joy to share with you the following uplifting report. It describes ways we saw God work through us in 2023 as he continued to call people out of darkness into his marvelous light.

**To God be the glory. Great things he has done!**

PRESIDENT, SONSET SOLUTIONS

*Celebrating*  
**100,000**

SonSet® radios  
delivered worldwide

At the end of this year we reached a milestone thanks to God's faithfulness — 100,000 SonSet radios delivered worldwide! One of the first orders was sent to Wantok Radio Light in Papua New Guinea in 2006. These men, pictured with SonSet radios, had been "rascals" or criminal gang members, but they came to faith in Christ through the radio station.

# Ministry by the Numbers in 2023

125

We assisted **125** ministries in **51** countries with equipment, service, consultation and training.

156

**156** SonSetLink® monitoring units encompassing **6** different models were shipped to **12** countries.

44

We sent **44** Solar Ministry Toolkits to **4** ministry partners in **4** countries.

10

Our Power Solutions Team worked on **10** different projects providing consultation and solutions for **6** ministries in **6** countries.

Our Broadcast Solutions Team repaired **14** transmitters, supplied transmitter replacement parts, and did hundreds of consultations by email, WhatsApp, Zoom, phone calls, and in-person visits.

14

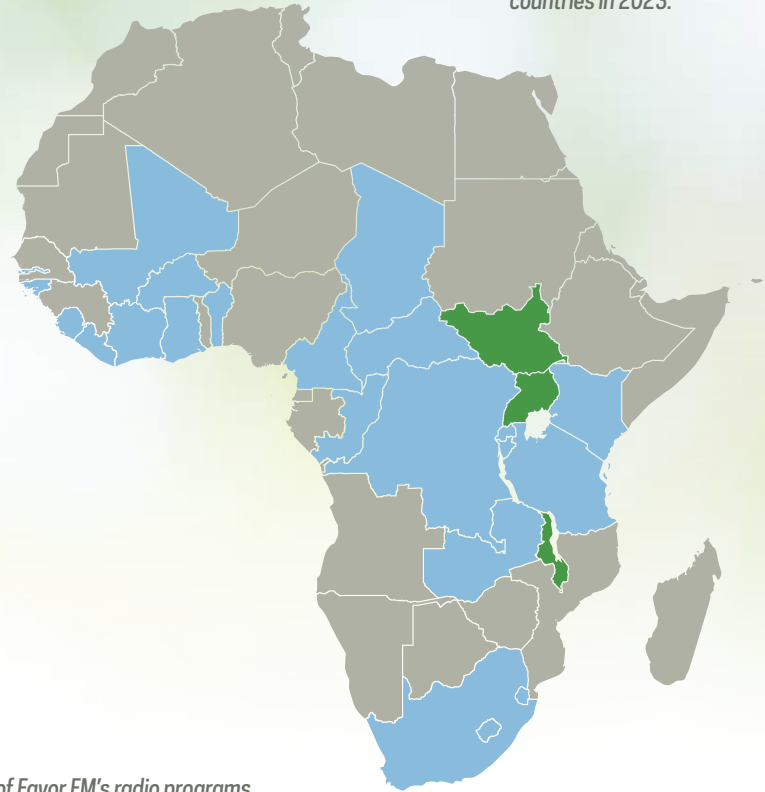

# Africa

## Reaching the World Through Technology

● = SonSet Solutions assisted  
ministry partners in these  
countries in 2023.

FAVOR INTERNATIONAL

### Uganda & South Sudan

*These children are reading a story from a children's Bible for one of Favor FM's radio programs. In 2023, they received 52,554 calls to the station and reported 13,236 salvation testimonies through the radio ministry. We helped Favor International upgrade their radio station in Gulu, Uganda, and establish another station in Juba, South Sudan, in 2015.*

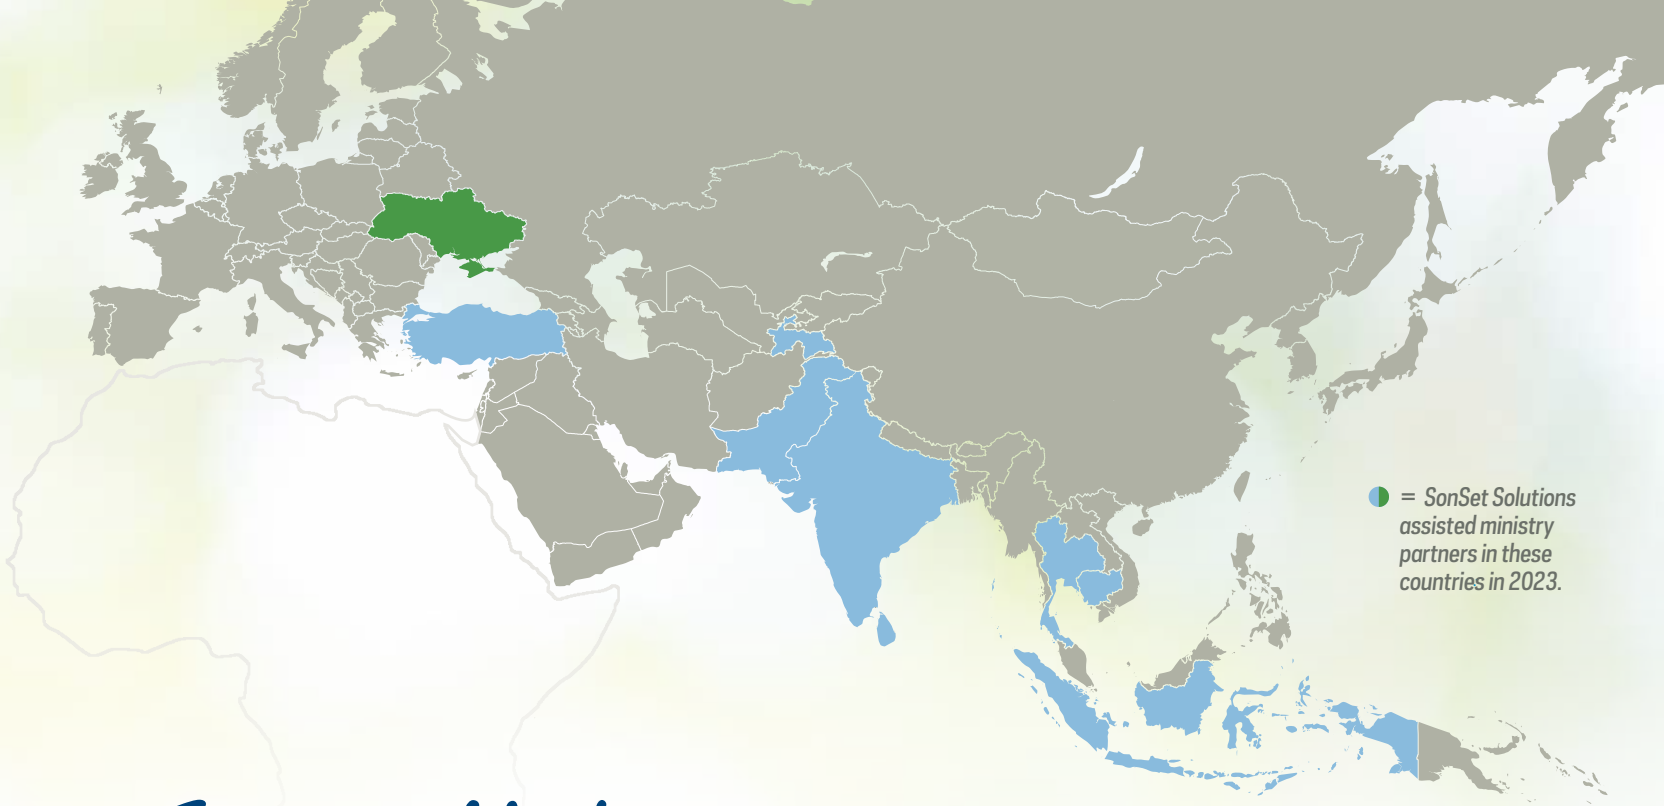

# Malawi

2023 marked ten years since the installation of the very first permanent LifePump™ in Zolomondo, Malawi. This village has not had a single day of downtime since 2013 when the pump was first installed. Our very own mechanical engineer, Cody Hall, was part of that initial installation. In 2019, a LifePumpLink™ (using SonSetLink technology) was added, providing daily access to pump performance data. These children ONLY know life with clean water and are living and thriving because of it.

FAIROR INTERNATIONAL

# Europe/Asia

Reaching the World Through Technology

# Ukraine

For the past 90 years, Slavic Gospel Association (SGA) has been ministering in the former Soviet Bloc countries of Eastern Europe and Central Asia. After the war began in Ukraine, they found out about one of our technologies and knew it would strengthen the outreach of frontline churches.

With our Solar Ministry Toolkit (SMT), SGA was able to provide these churches with the necessary equipment to power lights and charge cell phones. A total of 40 SMTs were sent, two of which had the addition of an amplifier, microphone and speakers to use for evangelism in parks, streets and villages.

Due to the shelling, most churches cannot meet above ground, so SMTs have been delivered to bomb shelters where churches are able to provide safety for believers and non-believers alike. Here they find not only light and cell-phone charging stations, but food, shelter, comfort, love and the gospel.

# Oceania & The Americas

Reaching the World Through Technology

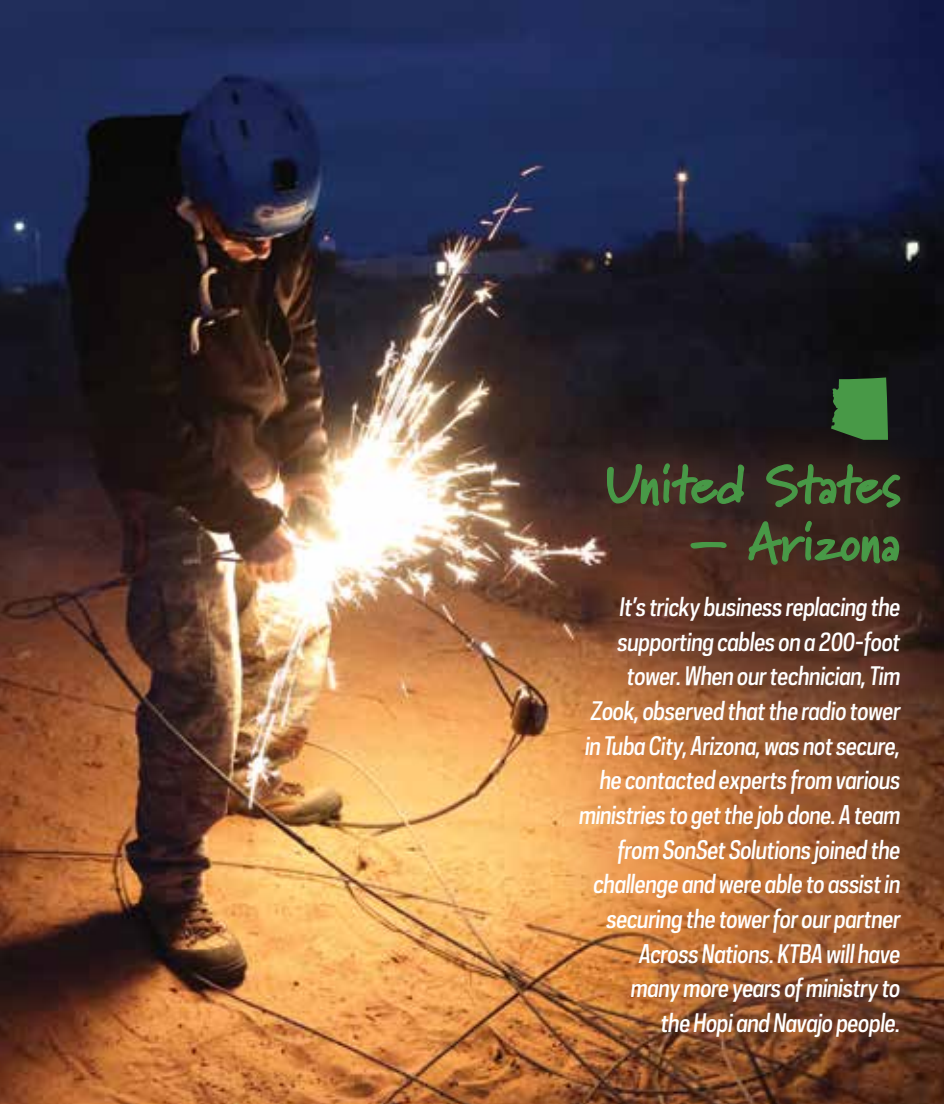

● = SonSet Solutions assisted ministry partners in these countries in 2023.

(Ministry partners also in Fiji and Samoa)

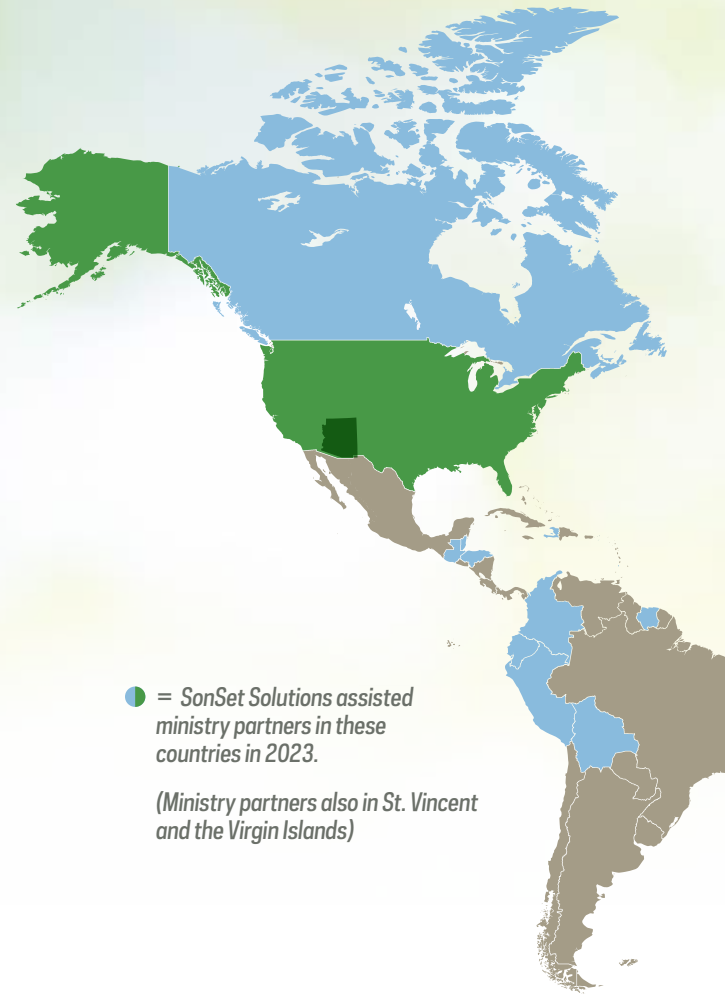

**Guam** One of our engineers, Larry McGuire, made replacement parts for high-power transmitter switches which he helped manufacture ten years ago for TWR Guam. They are broadcasting gospel programming to 19 countries in Oceania and Asia.

## United States — Arizona

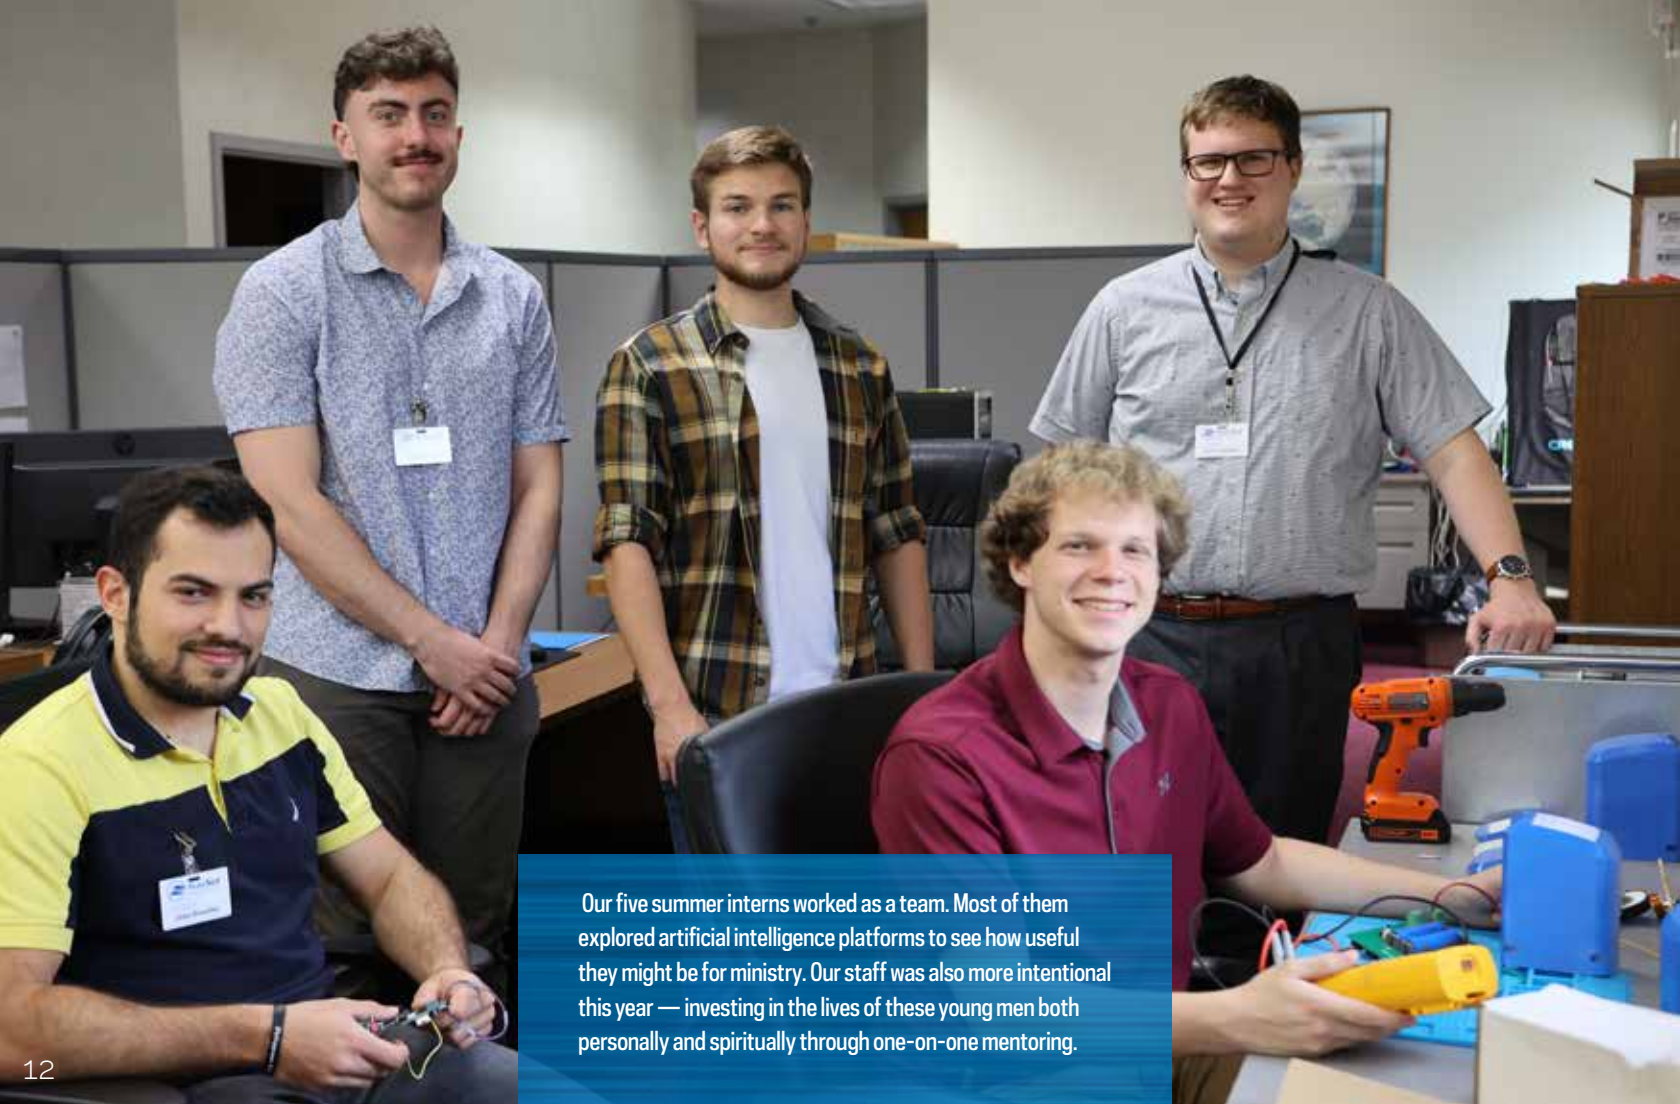

*It's tricky business replacing the supporting cables on a 200-foot tower. When our technician, Tim Zook, observed that the radio tower in Tuba City, Arizona, was not secure, he contacted experts from various ministries to get the job done. A team from SonSet Solutions joined the challenge and were able to assist in securing the tower for our partner Across Nations. KTBA will have many more years of ministry to the Hopi and Navajo people.*

● = SonSet Solutions assisted ministry partners in these countries in 2023.

*(Ministry partners also in St. Vincent and the Virgin Islands)*

Our five summer interns worked as a team. Most of them explored artificial intelligence platforms to see how useful they might be for ministry. Our staff was also more intentional this year — investing in the lives of these young men both personally and spiritually through one-on-one mentoring.

# Ministry by the Numbers in 2023

11,324

We shipped **11,324** SonSet radios to **24** ministries in **18** countries.

5

We gained **5** new global ministry partners, expanding our reach into difficult places.

9

**9** staff members traveled to assist ministries in **7** locations around the world.

\$24,468

**6** churches raised **\$24,468** for **532** SonSet radios and **2** Solar Ministry Toolkits.

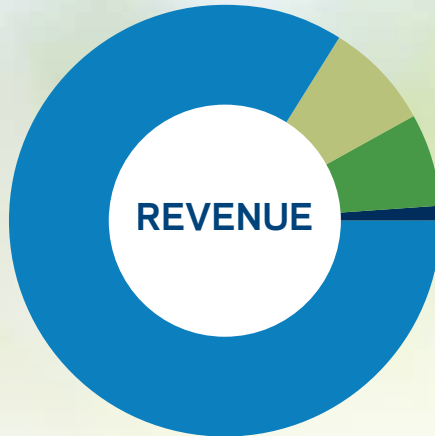

2,250

In 2023, approximately **2,250** SonSetLink units transmitted **269,861** messages with pump and water system data.

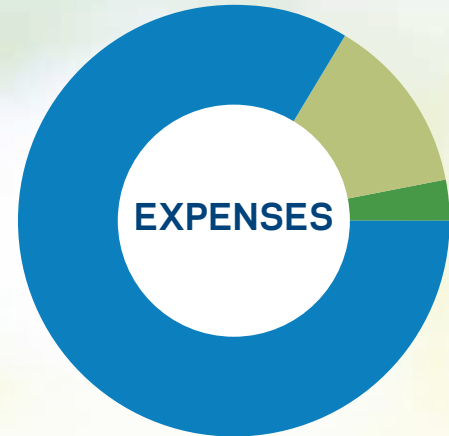

9,700

**21** work teams came to prepare **9,700** radios for shipment to **16** countries.

# Financial Report

Contributions	83.94%
Contributed Services	7.88%
Ministry Service Revenue	7.33%
Other	0.85%

Ministry	83.87%
General and Administrative	13.12%
Fundraising	3.01%

*Note: Percentages presented above are preliminary.*

We employed two new manufacturing and prototyping tools – a Haas CNC Machine (pictured) and a Selective Laser Sintering 3D Printer. We can now print or machine, in-house, almost anything we need for a project, speeding the development of innovative solutions.
