

Software Developer

Use your software design and development skills to create tools that advance the gospel around the world. Apply your experience in systems analysis, coding and software support to implement embedded, database and web app solutions that aid our partners in the fulfillment of the great commission. Work with our core ministry teams to provide robust data management systems that complement our hardware implementations.

Qualifications – Excels in analytical thinking and creative solution designs. Proficiency in computer languages and development tools. General knowledge of the Windows and Linux operating systems. Able to work in small, multidisciplinary teams where ingenuity, flexibility, and a passion to serve others are highly valued. Strong verbal and written communication skills. General ability to work on computer hardware integration and troubleshooting.

Responsibilities – Create computer software implementations and apply creative design skills in support of software-based systems. Research new technologies. Analyze systems requirements. Specify and identify potential solutions. Carry out software and database research, design, coding, and testing. Develop and work with real-time monitor and control systems, backend database management, frontend web page interfaces and mobile applications. Engage in computer system integration and testing, systems support, maintenance, and upgrades. Participate in student initiatives and intern supervision, training and mentoring.

Fundamental Requirements – Be a born-again follower of Jesus Christ with a heart for service, passionate for the advancement of the gospel around the world, and willing to uphold the [SonSet Solutions Statement of Faith](#).

This is a full-time or part-time position, either at our offices in Elkhart, Indiana, or working remotely. For supported staff, it requires the development of ministry partnerships for prayer and financial backing. A volunteer may also fill this position.
