

Internship Opportunities 2021

About SonSet Solutions

SonSet Solutions is an evangelical mission dedicated to providing technology-based solutions to front-line ministries. We assist them with analysis, development and implementation of designs and tools to expand the reach and deepen the impact of their work. We help media and community development ministries with radio station consulting, installation, and major upgrades; provision of solar-powered radio receivers/audio players; and web-based access to performance information from clean-water systems. We are also developing solutions to leverage mobile technology and address developing-world power issues.

We are seeking people who are deeply committed to Christ and passionate about making an impact for God's kingdom. We need a team with diverse skills to advance the gospel worldwide - engineers, storytellers, software developers, media producers, and more. Our internships are hands-on and a unique opportunity to pursue on-the-job spiritual and professional growth while serving in a missions context. Join us to use your knowledge and experience to solve today's ministry challenges and help ministries around the world.

Summer 2021 Internship Positions

Digital Media Intern

Engage with our media team to produce videos of our work with ministry partners around the world. We also aim to produce thought-provoking content that impacts people for Christ. Whether on the field or in our fully equipped production studio, our goal is to produce engaging, focused, and deliberate storytelling videos. Check out our YouTube channel to see some of our work.

Electrical Engineering Intern

Innovative and reliable electrical design and development is at the core of many of our technology-based solutions, and enables us to meet the unique design requirements of our ministry partners. Electrical engineering interns apply electrical/electronic hardware and embedded software design and other creative skills to the development of these solutions. This may include technology research; hardware design, prototype implementation and testing; embedded software design, coding, and testing; hardware and software integration and testing; and systems support and maintenance.

Mechanical Engineering Intern

Solid mechanical design and development is essential to many of our technology-based solutions, and enables us to meet the unique design requirements of our ministry partners. Mechanical engineering interns apply mechanical and system design and

other creative skills to the development of these solutions. This may include research, component and system design, prototype implementation and testing, system support and parts fabrication in our extensive machine shop.

Software Development Intern

Creative software design and development is at the heart of our technology, and is essential to our development efforts in a world where devices are becoming increasingly more powerful and interconnected. Software development interns work on technology research, systems requirements analysis, specification, and potential solution identification. They carry out software and database research, design, coding, and testing. Our applications include real-time monitoring and control, backend database management, frontend web page interfaces, and mobile applications.

Communications and Public Relations Intern

Our Communications/Public Relations department tells the stories and creates the communications that attract new and seasoned friends to the ministry. Interns assist in the creation and organization of these communication pieces in order to engage the public and provide opportunities for them to join our prayer and support team. We are looking for interns with skills in writing, graphic design, and social media. Interns may also assist in the planning and execution of external events, meetings, and presentations.

Internship Summary

An internship at SonSet Solutions is typically ten to twelve weeks in duration usually during, but not limited to, the summer months. You will work side-by-side with technical missionaries and volunteers at our facilities in Elkhart, Indiana, and live with one of our staff families. You must be an active follower of the Lord Jesus Christ and be willing to sign the SonSet Solutions Statement of Faith.

As a non-profit mission organization, SonSet Solutions is not able to pay salaries to our interns. Compensation is a combination of room and board and a weekly stipend. We require our interns to seek financial support as a way of recognizing their dependence on God and providing an opportunity for others to be involved in their ministry, just as our missionaries do. We will guide and assist you in the support-raising process.

Next Step

The link for our online internship application is at SonSetSolutions.org/students/. For summer 2021 internships, the early bird application deadline is November 30, 2020. We will extend a first round of internship offers by mid-December. The final application deadline is February 28, 2021 with offers extended in March 2021. If you have further questions, please email Charlie Jacobson at collegerep@sonsetsolutions.org, call our office at (574) 970-4252 ext. 275, or text (574)326-9353.
