

Technical Projects Manager

Use your leadership experience and technical skills to oversee radio technology solutions that advance the gospel around the world. Create strategies and methodologies that serve our ministry partners who are or want to use broadcast radio to aid them in the fulfillment of the Great Commission. Direct our Broadcast Solutions Team (BST) in consultations, design, acquisition, and deployment of effective radio broadcasting solutions.

Qualifications – Proven ability to supervise and manage team members effectively. Experience in managing production schedules. Proficiency in standard computer programs including Microsoft Office Suite. Strong organizational skills with the ability to complete projects in a timely manner. Excellent communication and leadership skills. Ability to balance technical needs with ministry objectives. Training or experience in broadcast operations, engineering, installation, maintenance, and equipment repair is preferred.

Responsibilities – Manage the Broadcast Solutions Team. Lead all radio related projects and partner relationships. Oversee purchasing, transmitter and antenna production, equipment service/repair operations, and shipping logistics. Process and track all equipment orders with radio ministry partners. Ensure quality control across all broadcast equipment production. Oversee the BST annual planning and budgeting processes.

Fundamental Requirements – Be a born-again follower of Jesus Christ with a heart for service, passionate for the advancement of the gospel around the world, and willing to uphold the [SonSet Solutions Statement of Faith](#).

This is a full-time position at our offices in Elkhart, Indiana. For supported staff, it requires the development of ministry partnerships for prayer and financial backing. A volunteer may also fill this position.
